

INBRED MAIZE LINE PH5HK

Philip Richard Martin

Abstract

5 An inbred maize line, designated PH5HK, the plants and seeds of inbred maize line PH5HK, methods for producing a maize plant, either inbred or hybrid, produced by crossing the inbred maize line PH5HK with itself or with another maize plant, and hybrid maize seeds and plants produced by crossing the inbred line PH5HK with another maize line or plant and to methods for producing a maize plant containing in its genetic
10 material one or more transgenes and to the transgenic maize plants produced by that method. This invention also relates to inbred maize lines derived from inbred maize line PH5HK, to methods for producing other inbred maize lines derived from inbred maize line PH5HK and to the inbred maize lines derived by the use of those methods.
